

Gloucester Rugby

Conversion of the playing surface at Kingsholm Stadium to artificial turf including new irrigation system. Also, installation of the same artificial turf system at the new indoor training facility.

Site: Kingsholm Road, Kingsholm, Gloucester GL1 3AX.

Synthetic System: ACT Global WXF60.

Project Value: £1,000,000

Contract Period: 12 Weeks

key facts

- ✓ Verde managed the upgrading of the existing pitch at Kingsholm to a whole-class artificial turf, offering players a premium playing surface with unmatched durability.
- ✓ Verde also provided support in the building of an elite high-performance training centre situated next door to Kingsholm Stadium, with the team constructing an indoor training pitch designed to greatly improve the training and playing experience for the club's players.

Communication and delivery were superb throughout and the overall finished product is something we are very proud of.

*Alex Brown,
COO, Gloucester Rugby*
